This is an official Gapps for Android 4.4.2 Kitkat ARM Flashable.zip, which are fully compatible with this firmware version of the OS. These are tested on a variety of devices and have been pulled from our databases so that no one else can tamper with them to create different versions or similar looking files that may not be genuine LG Apps Introduction The story about how I got stuck in a really bad writer's block will be told through this blog post called "How to Overcome Writer's Block. This is the official Gapps that I recommended to my friends. I tried installing them on my device and they worked well. If you want to try out the latest Android 4.4.2 Kitkat firmware on your LG Optimus G, then this is the right Gapps for you. You don't have to go through all kinds of trouble just so you can get the latest firmware version on your LG phone or tablet, all you need to do is use this method. This is meant for those who are already running Android 4.4.2 Kitkat and want to install some apps that may not be supported on some other apps on Google Play Store, this is for any of you who want to upgrade the version of Kitkat on your LG Optimus G. What's Included In this Official Gapps Package: 1. Google Launcher For Android 4.4.2 Kitkat

2. Google Calendar
3. Google Clock Widget
4. Gmail 4.5
5. Google Hangouts
